

Agricultural Graduate Opportunity

Ag Diagnostics are excited to be recruiting for a graduate or recent graduate in Agricultural Science with an emphasis on Agronomy and a passion for the livestock sector.

Job Title Graduate Agronomist

Job Type Full Time, Permanent

About the Business Ag Diagnostics is an established independent agricultural consultancy business that focuses on 'bridging the gap between agronomy and ruminant nutrition'. Our passion is assisting our clients grow crops and pastures to turn into red-meat, wool and dairy products in a profitable manner.

We have a diverse client base in the sheep, beef, dairy, cropping and forestry sectors both irrigated and dryland. Our services include agronomy, ruminant nutrition, agricultural asset management, agribusiness analysis and product research trials. Our clients are located throughout Western Victoria, South East South Australia and Tasmania.

One of our strengths is the direct links our Senior Consultants have to their own Agribusinesses with investments in the Dairy and Sheep/Beef Sectors. We practice what we preach which sets us apart in terms of our agricultural experience.

Ag Diagnostics is based entirely on a fee for service model. With pride ourselves on our independence from re-sellers which allows us to focus on what's best for our clients.

About the Role The Graduate Agronomist role will report directly to the Senior Consultant (Agronomy). Duties will involve soil, tissue or feed testing, analysis of soil/tissue/feed test data and collation into usable forms, inspection of crops and pastures initially under supervision but building into independent work. Providing clients with agrichemical, seed and fertiliser recommendations.

There will be opportunities to attend industry events and training courses as and where appropriate as we recognise the importance of building the successful candidates skill-set.

About the Candidate

- An undergraduate degree with an agriculture focus is a minimum requirement for this role.
- Ideally you will have had some experience in crop or pasture agronomy.
- A willingness to develop skills in ruminant nutrition to complement your crop and pasture agronomy skills.
- Understanding of grazing systems in particular sheep/beef and dairy.
- Excellent computer skills across the Microsoft suite.
- Eligible to work in Australia

Package Very attractive remuneration package by negotiation.
